Vertical retractable insect screen

LUXE VERTICAL EASY KIT

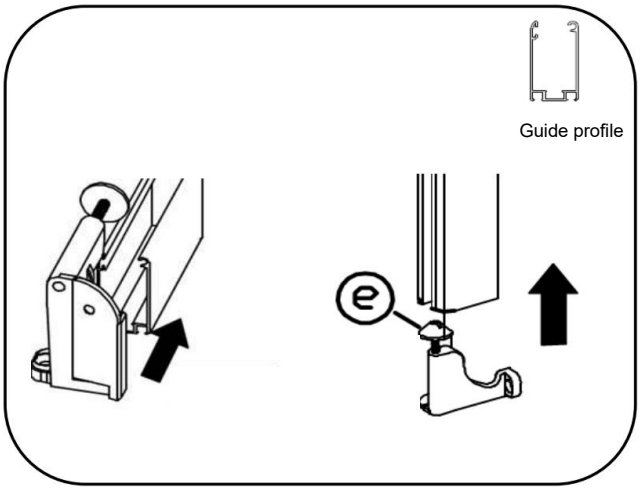

INSTALLATION INSTRUCTIONS

1

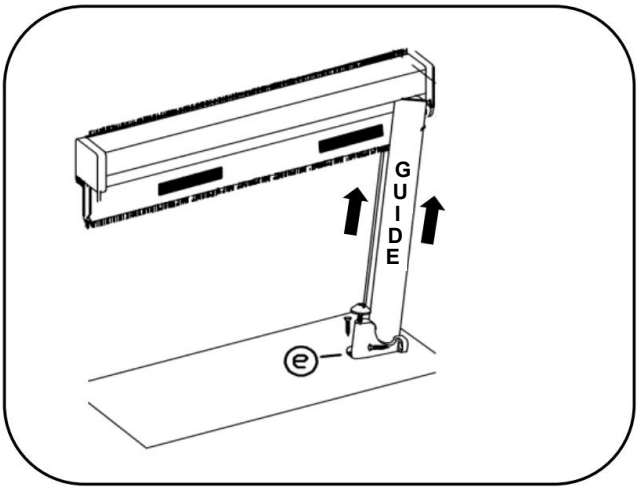

Fit the spring-loaded mounting brackets onto the screen, making sure the tabs for the guides face outwards. Press the screen into place at the top of the window opening.

2

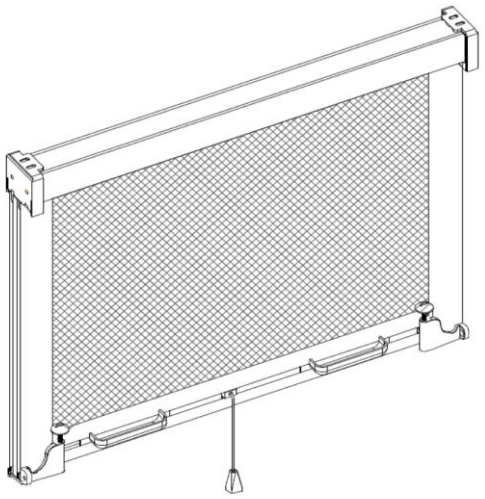

Fit the adjustable catches (e) into the bottom of the guide. The adjustable catch screws must face inwards.

3

Hold the guide diagonally, fit it onto the tabs projecting from the mounting brackets and move it into position. Repeat with the other guide. Screw the adjustable catches to the floor or wall. Apply silicone around the screen perimeter to improve the seal and secure it in place.
